

Getting precisely to the point.

Tailor-made modular labelling machines.

Combining what belongs together HERMA labelling systems

If you develop an idea from scratch to perfection you will gain a reputation. So, even beyond Europe HERMA is well known as a specialist for and the leader in self-adhesive technology.

From manufacturing adhesive compounds through to labelling machines – HERMA comprises the complete chain of know-how. Whether a robust dispenser, a compact semi-automatic machine or the high-tech inline solution, HERMA labelling machines are a byword for precision and economic viability. And for all kinds of label applications on any surface with pinpoint accuracy.

HERMA adhesive compounds – the ideal basis for your labelling.

HERMA labelling machines – precision work of the highest standard.

No control cabinet required – HERMA 400

Fast, versatile, compact and fully automatic if required.

HERMA 400, the new generation of HERMA labelling machines can do just about anything, because they can be inexpensively fitted with a wide range of accessories. With their modular and compact design, they can be adapted to any production line, exactly as you need.

HERMA 400 – label applicators

- > Uniquely compact thanks to integrated control system with no control cabinet.
- > Extremely precise with automatic synchronisation, state-of-the-art drive technology and maximum positioning accuracy of 0.3 mm.
- > Comprehensive range of modules: pedestals, label sensors, printing and embossing units.
- > Easy to integrate in existing production lines.
- > Left- or right-hand model, upright, horizontal or suspended operation.

HERMA 400

Precise application on small batches – HERMA semi-automatic and manual dispensers

Do you have to label small batches economically, keeping the costs down but with no loss of precision? With their robust design, HERMA semi-automatic and manual dispensers are the perfect solution. HERMA has semi-automatic models for flat, wrap-around and two-side labelling.

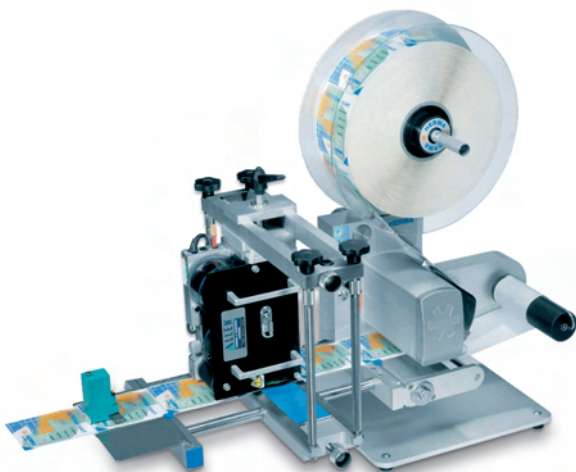

HERMA 100 – manual dispensers

- > Practical, fast and easy to use
- > The electronic drive automatically passes on the next label
- > With backing paper take-up unit for smooth dispensing

HERMA 400 Fix – compact unit

- > High-tech manual system, based on the HERMA 400
- > Robust design with standard reel holder and powerful motor
- > Can be easily equipped with a product jig and hot foil coder
- > Also suitable for intensive industrial use

HERMA 400 Fix

HERMA 311 – semi-automatic two-side labelling system

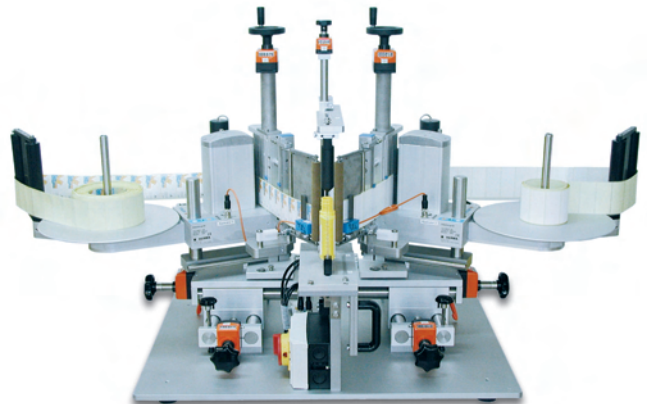

- > Unique in its field: simultaneous labelling of both sides, even on small batches
- > Minimum setting-up times thanks to maximum flexibility
- > Automatic, synchronous product fixing
- > From flat to oval, suitable for almost any shape of product
- > Labelling module: HERMA 400

HERMA 414 – for flat labelling

- > Compact, robust and with a moving beak for exceptional precision
- > Ideal for flat or curved surfaces
- > Proven for labelling on ridges, recesses or over edges
- > Labelling module: HERMA 400

HERMA 211 – for wrap-around labelling

- > Robust and ideally suited to continuous operation
- > Ideal for cylindrical products such as tubes, bottles or ampoules
- > Labelling module: HERMA 400

HERMA 311

Concentrating on the basics – the HERMA Compact Line

Extremely reliable and powerful. Little space and budget requirements.
For side, bottom, top and wrap-around labelling. Can be expanded as required with optional standard modules. Available at any time. This is what our HERMA Compact Line stands for. Labelling machines that adapt to your needs.

HERMA Compact Line 152 C Standard

- > For inexpensive wrap-around labelling
- > Robust design
- > Available at very short notice
- > Can be fitted with printer units, unwinder or backing paper take-up unit

HERMA Compact Line 152 C Prisma

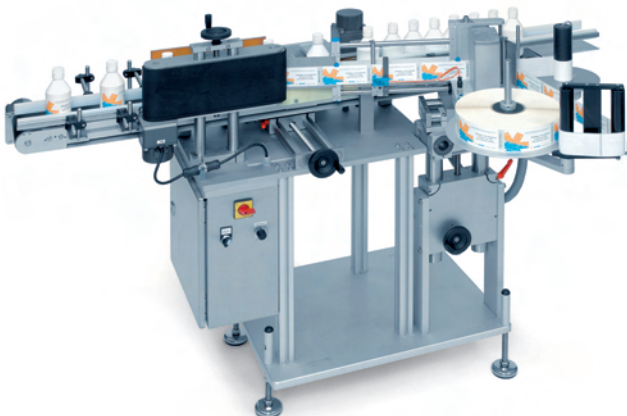

- > Wrap-around labelling for intermittent product feed
- > With roller prism and roller-type separator
- > Precise labelling even where shapes vary
- > Easy to adapt to different product sizes thanks to freely adjustable roller prism

HERMA Compact Line 652 C

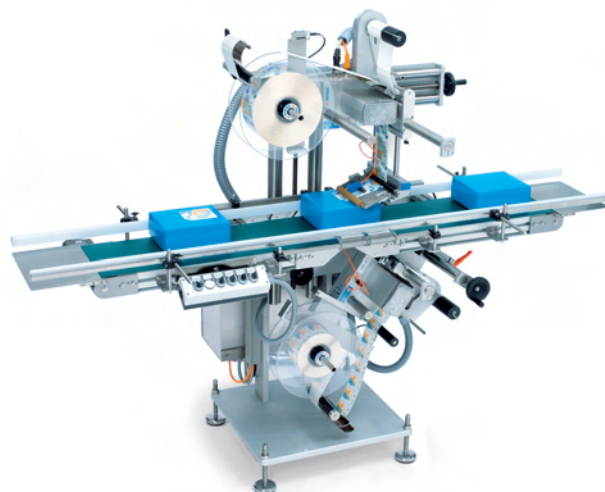

- > Fully automatic top and bottom labelling in a single cycle
- > The basis for success: two HERMA 400 applicators
- > Continuously adjustable speed and product formats

HERMA Compact Line 362 C

- > Precise side labelling
- > Sturdy labelling system without change parts
- > Quick and easy to retool
- > Based on one or two HERMA 400 modules
- > Product stabilisation option with synchronised top belt

HERMA 152 C

HERMA 652 C

Labelling to the highest standards – HERMA M series

Speed, precision and technical perfection: the HERMA M series is used where maximum productivity is required. As a standalone or inline solution, it provides maximum reliability for two-side or wrap-around labelling. Thanks to its modular design, it won't break your budget either.

HERMA 362 M: Precise two-side labelling

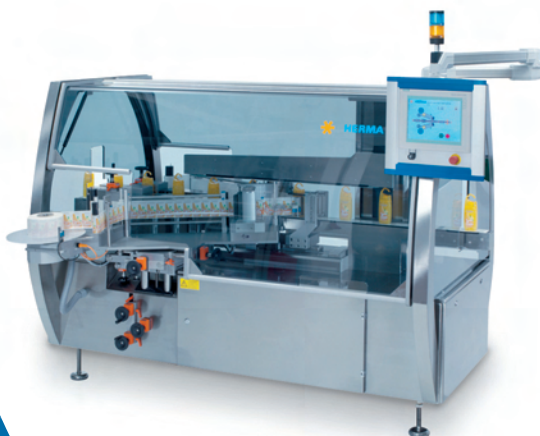

- > Maximum precision for two-side labelling, even at high outputs
- > Ideal for labelling complex, irregularly shaped products
- > Maximum flexibility thanks to separate, easy-to-fit additional modules and operation in standalone or inline mode
- > Simple handling thanks to intuitive touch panel and optimum accessibility of all components

HERMA 040 M: The new benchmark for wrap-around labelling

- > Extremely precise labelling thanks to intermittently rotating starwheel (approx. 200 products per minute)
- > High-speed labelling of cylindrical packaging up to 110 millimetres
- > The intermittent mode allows different labels to be applied to a product
- > Height error tolerance only +/- 0.5 mm – even at high speed
- > User-friendly, short set-up times and easy format change

HERMA 132 M: Wrap-around labelling at maximum speed

- > The high-performance specialist for wrap-around labelling
- > Continuous starwheel operation for up to 400 products per minute

HERMA 362 M

HERMA 040 M

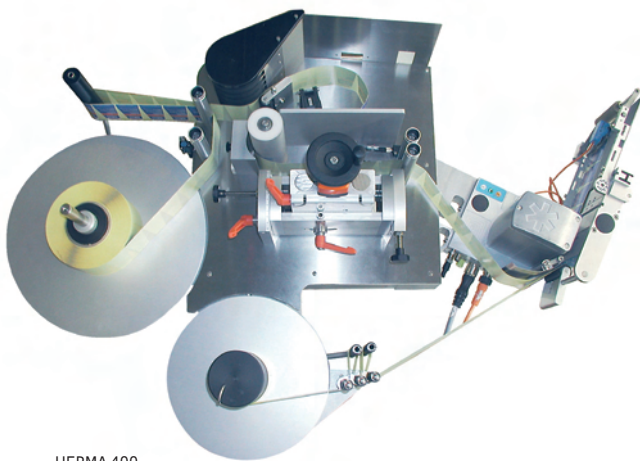

Ideal for installing in your rotary machines – HERMA 400 special version

High speeds, maximum precision and minimum space requirements.

The HERMA 400 special version brings out the best in your rotary machines. With its integrated controls and compact design, it makes space for up to six labelling units per station.

HERMA 400 – component for rotary machines

- > Suitable labelling module for any rotary machine
- > High labelling speed and maximum precision: 145 m/min
- > High labelling output: 1000 – 2000 labels per minute
- > Adjustable height and angle
- > Automatic speed synchronisation
- > Serial data connection option to higher-level control system
- > Controls completely integrated in the machine, no separate control cabinet
